

InfraMind EPC — Capability Statement

Samanta Nayak | Manager – Contracts & Claims | Infrastructure AI Architect

inframindepc.com | June 2026

Who I Am

I am a contracts and claims professional with 19+ years of experience in EPC infrastructure delivery. I currently serve as Manager – Contracts and Claim Management at Larsen & Toubro, where I administer FIDIC-governed contracts, prepare and defend EOT and quantum claims, manage dispute board interactions, and maintain the contemporaneous record systems that decide whether a claim stands or falls in arbitration.

Alongside that work, I build AI-enabled operational tools for EPC projects — systems for document intelligence, digital project twins, NCR tracking, and contract analysis — designed around the problems I manage every day.

That combination — field-hardened domain expertise and live AI system development — is what InfraMind EPC represents.

What Makes This Different

Most organisations approach contract management and AI transformation as separate problems. Generic consultants lack contractual depth. Technology vendors lack delivery context. Legal counsel lacks site reality.

InfraMind EPC sits at the intersection of all three. Every tool and every advisory service is built by a practitioner who has administered FIDIC contracts on megaprojects, served as a Fact Witness in ICC arbitration, and built the digital systems on the same project where they were needed.

The work is tested in production. Not in a proof-of-concept.

Core Capabilities

Contract & Claims Management

Full FIDIC contract administration from award to completion — notice management, Sub-Clause 20.1 compliance, variation identification, claims preparation, EOT strategy, counter-claim defence, and dispute board management. Deployed on MAHSR T-3 (INR 3,142 Crore, FIDIC Yellow Book, JICA oversight) as Manager – Contracts & Claims, Larsen & Toubro.

Delay Analysis & EOT Preparation

Cause-and-effect delay analysis using recognised methodologies — Impacted As-Planned, Time Impact Analysis, Window Analysis, and As-Built vs As-Planned. Contemporaneous record compilation and EOT claim preparation built to ICC arbitration standard. 100% Sub-Clause 20.1 compliance achieved on MAHSR T-3 (personal track record, L&T).

Project Controls & Planning

Primavera P6 baseline development, schedule variance analysis, critical path management, resource levelling, three-month look-ahead planning, and monthly progress reporting. Integrated with claims and contract administration workflows.

AI-Enabled Operational Intelligence

AI-augmented systems for EPC contract and project operations:

Product	Function	Status
MAHSR T-3 Digital Twin	Live project operational intelligence	In Production
NCR Tracker	Quality non-conformance management	In Production
Contract Forensics	AI-assisted contract clause extraction and analysis	Demonstrable
OCR Intelligence	Document digitisation and handwritten record recognition	Demonstrable

Dispute Resolution & Arbitration Support

Expert report preparation, factual witness statements, cross-examination preparation, and tribunal submission support for ICC, DIAC, SIAC, and LCIA proceedings. Served as Fact Witness in ICC arbitration — OPGC MGR Railway Project (personal track record, L&T).

Personal Track Record

The following metrics reflect Samanta Nayak's direct project experience at Larsen & Toubro — not InfraMind EPC client engagements, which are yet to commence.

Metric	Result	Project / Context
Sub-Clause 20.1 Notice Compliance	100%	MAHSR T-3, L&T
EOT Claims Submitted	15+	MAHSR T-3, L&T
Audit Trail Standard	ICC arbitration-ready	MAHSR T-3, L&T
Delay Analysis Standard	Forensic-grade	MAHSR T-3 & OPGC MGR, L&T
Arbitration Role	ICC Fact Witness	OPGC MGR Railway Project, L&T

Representative Project Experience

Project	Role	Scope
MAHSR T-3 Track Package	Manager – Contracts & Claims, L&T	FIDIC Yellow Book contract administration for 115.877 km of high-speed rail track construction under JICA/JICC oversight. INR 3,142 Crore.
ICC Arbitration – OPGC MGR Railway Project	Fact Witness, L&T	Full arbitration lifecycle — SOC through Award Disposal. Statement of Claim, evidence dossiers, cross-examination, counter-claim.
AI Product Deployment	Founder, InfraMind EPC	Operational deployment of Digital Twin and NCR Tracker on live EPC megaproject.

Proposed Advisory Services

The following engagement structures represent how InfraMind EPC advisory services are designed to operate. No client engagements are currently active — these are proposed models available for discussion.

Service	Target Audience	Proposed Duration
AI Strategy for EPC Operations	EPC contractors seeking AI adoption	60–90 min initial consultation
Digital Twin Architecture	Linear infrastructure contractors	90 min scoping session
Contract Intelligence Design	Legal counsel and contracts managers	60 min (NDA-protected)
Expert Advisory	Legal counsel and expert witnesses	30–60 min (NDA-protected)
Planning, Scheduling & Programme Controls	EPC project controls teams	Scoped per project
Delay Analysis & EOT Claims Support	Contracts managers, legal counsel, project directors	Scoped per claim complexity

Credentials

- 19+ Years EPC Infrastructure Experience — site execution through contract management and dispute resolution
- Manager – Contracts & Claims, Larsen & Toubro (10 years)
- ICC Arbitration Fact Witness — OPGC MGR Railway Project
- AI Generalist Certification — Outskill
- AIG Community Champion 2025 — AI leadership and knowledge sharing
- Trained in SCL Delay and Disruption Protocol, FIDIC 1999 and 2017, ICC Arbitration procedures
- Primavera P6, TILOS, Oracle Unifier (qualified)
