

InfraMind AI

Executive Capability Statement

AI-Enabled EPC Operational Intelligence

June 2026

Confidential — For Intended Recipient Only

Executive Summary

InfraMind AI delivers practitioner-built AI operational intelligence systems for EPC megaprojects. Founded by **Samanta Nayak** — a 20+ year EPC infrastructure veteran and ICC Arbitration Fact Witness — InfraMind AI encodes real-world contract administration expertise into deployed AI-augmented systems.

Mission: Eliminate the information lag that transforms manageable risks into costly disputes on infrastructure megaprojects.

The Rarest Combination

Dimension	Capability
Experience	20+ years EPC infrastructure
Domain	FIDIC contract administration, claims & dispute resolution
Technical	AI engineering, full-stack development
Credibility	ICC Arbitration Fact Witness
Deployment	Live on MAHSR T-3 (INR 3,142 Crore FIDIC Yellow Book)

Product Portfolio

Operational Intelligence Products

MAHSR T-3 Digital Twin

Production

Operational Intelligence

75% MIS effort reduction

NCR Tracker

Production

Quality Intelligence

40%+ faster closure

Contract Forensics

Demonstrable

Contract Intelligence

Weeks → Hours review

OCR Intelligence

Demonstrable

Document Intelligence

98%+ accuracy

TCB Simulation

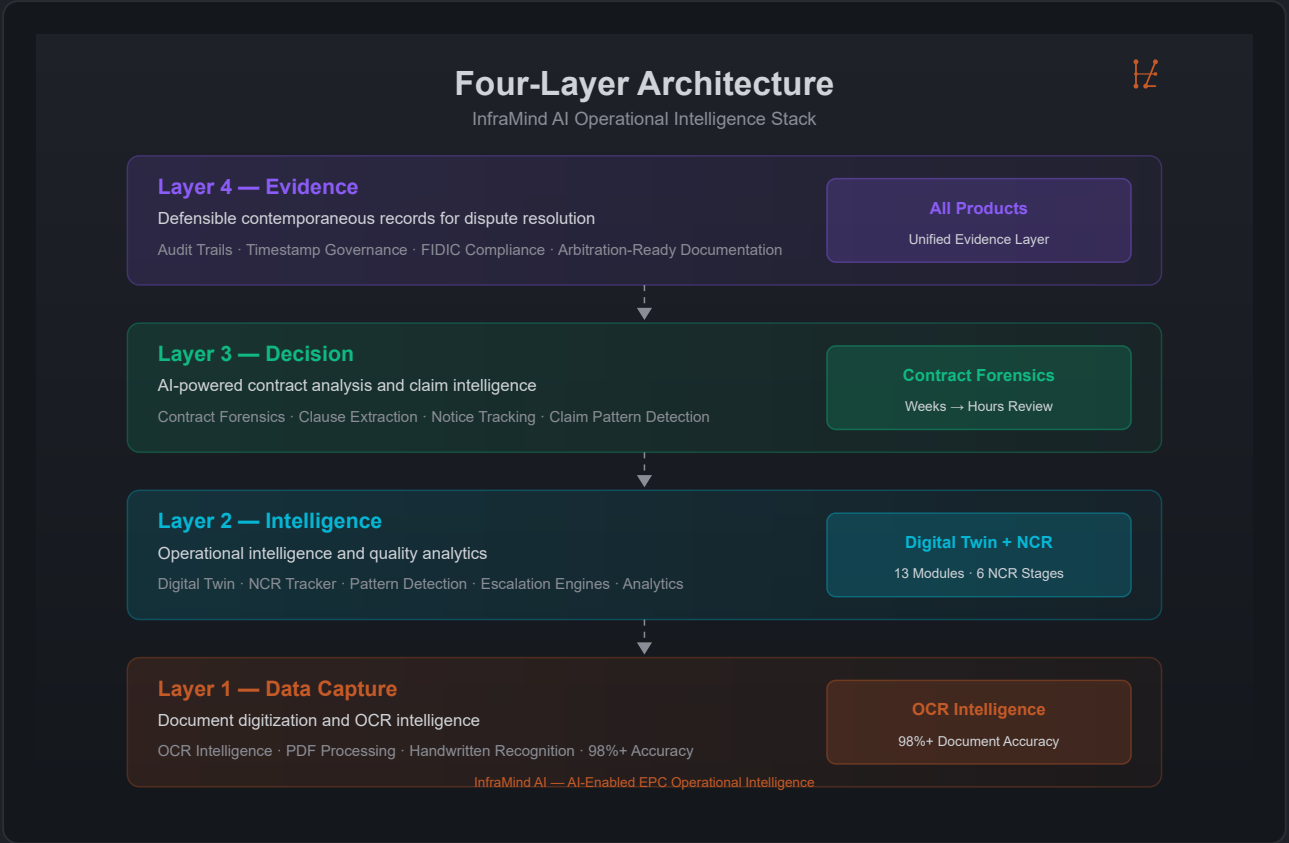

In Development

Programme Intelligence

Time-Cost-Buffer analysis

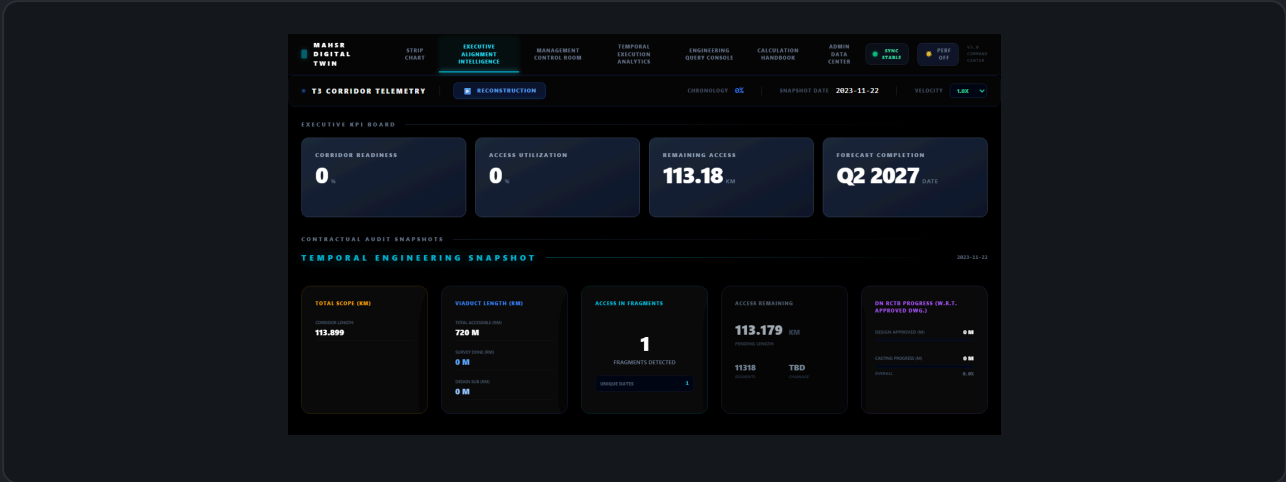

Four-Layer Architecture

Layer	Function	Products
Layer 1: Data Capture	Document digitization & OCR	OCR Intelligence
Layer 2: Intelligence	Operational intelligence & analytics	Digital Twin, NCR Tracker
Layer 3: Decision	AI-powered contract analysis	Contract Forensics
Layer 4: Evidence	Defensible contemporaneous records	All Products

MAHSR T-3 Digital Twin

13

Functional Modules

115.877 km

Chainage-Referenced

75%

MIS Effort Reduction

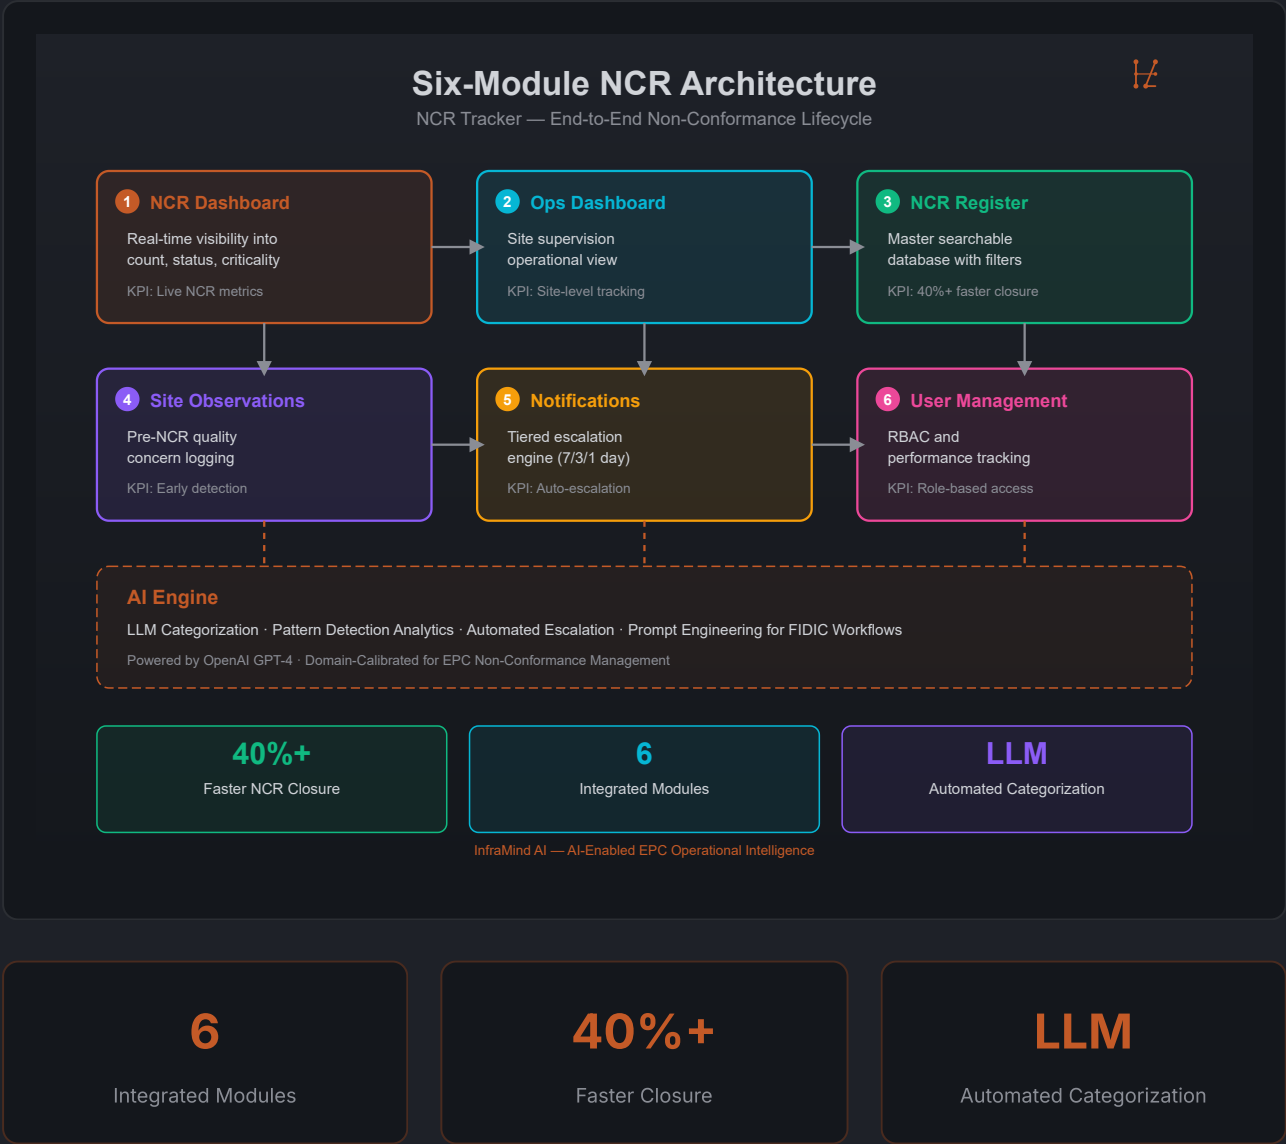

MAHSR T-3 Deployment

Mumbai-Ahmedabad High-Speed Rail — T-3 Track Package

Metric	Value
Contract Value	INR 3,142 Crore
Contract Form	FIDIC Yellow Book
Scope	115.877 km (Vadodara to Sabarmati)
Oversight	JICA / JICC
Employer	NHSRCL
Contractor	Larsen & Toubro Limited

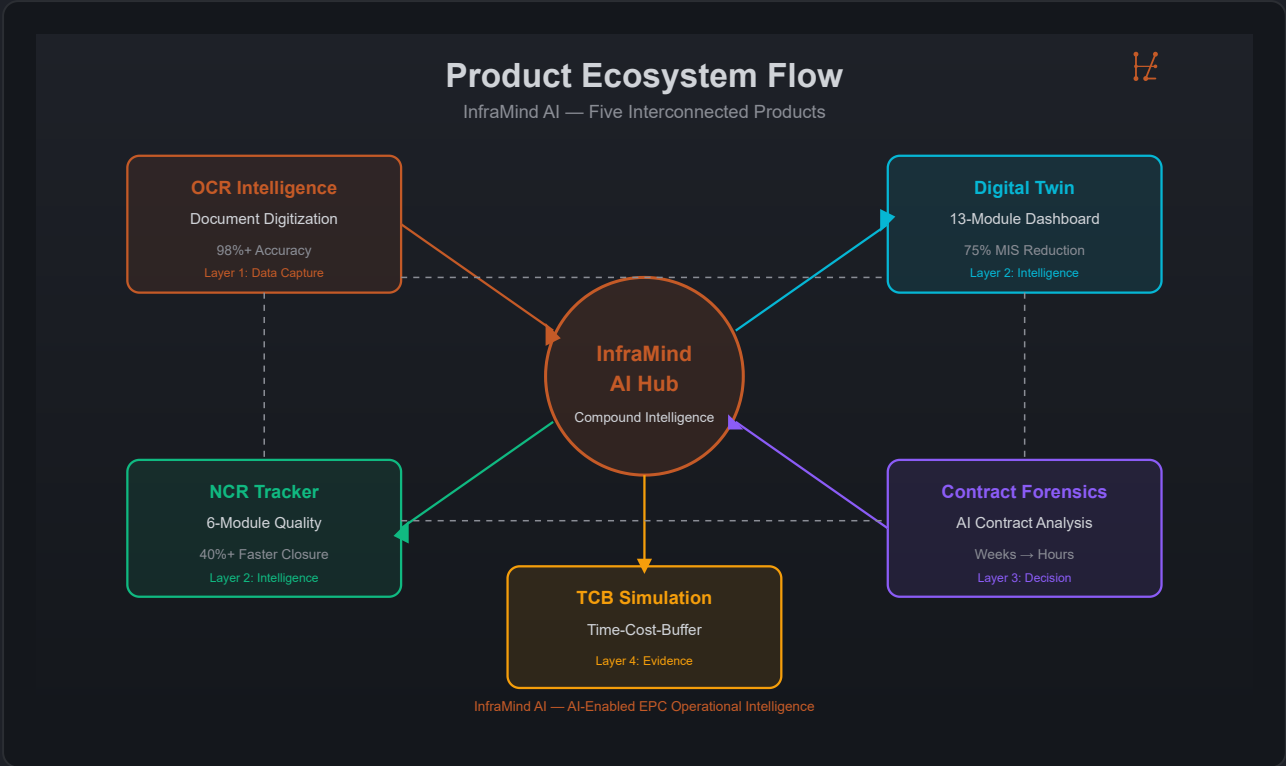

NCR Tracker

Product Ecosystem

Five interconnected products creating compound intelligence for EPC megaprojects. Each product operates independently while sharing data and insights across the ecosystem.

EPC Intelligence Consulting

AI Strategy Consulting

For: EPC contractors seeking AI adoption

Digital Twin Architecture

For: EPC contractors on linear infrastructure

Contract Intelligence Design

For: Legal counsel and contracts managers

Expert Advisory

For: Legal counsel and expert witnesses

Planning, Scheduling & Programme Controls

For: EPC contractors and project controls teams

Delay Analysis, EOT & Claims Support

For: Contract managers, legal counsel, project directors

Service Packages

Package	Services	Target
EPC Intelligence Starter	AI Strategy + Digital Twin Architecture	Mid-size EPC contractors
Megaproject Intelligence Suite	All consulting services	Large EPC contractors, JVs
Dispute Resolution Support	Expert Advisory + Contract Intelligence + Delay Analysis	Legal counsel, expert witnesses
Programme Controls Package	Planning & Scheduling + Delay Analysis & EOT	Project controls teams

Credentials

Career Timeline

20+ Years EPC Infrastructure Experience — Manager — Contracts & Claims, Larsen & Toubro Limited

ICC Arbitration Fact Witness — Dispute resolution and expert testimony

AI Generalist Certification — Outskill — Applied AI for business

AIG Community Champion 2025 — AI community leadership

Target Stakeholders

Stakeholder	Value Proposition
EPC Contractors	Operational intelligence, reduced contractual exposure
PMCs	Real-time project visibility, automated quality tracking
Infrastructure Owners	Defensible records, dispute prevention
Government Authorities	Compliance dashboards, audit-ready documentation
Rail Projects	Chainage-referenced corridor intelligence
Arbitration Support	ICC-grade evidence, expert testimony

AI Capability Matrix

Technology	Application	Status
Large Language Models (LLM)	Contract clause extraction, report generation	Production
OCR with AI Enhancement	Document digitization, handwritten recognition	Production
Rule-Based Automation	FIDIC notice monitoring, NCR escalation	Production
Pattern Detection Analytics	Systemic quality analysis, claim patterns	Pilot
Prompt Engineering	Domain-calibrated FIDIC/EPC workflows	Production

Vision

"To make operational intelligence the default state of EPC megaproject administration — eliminating the information lag that transforms manageable risks into costly disputes."
