InfraMind EPC

FIDIC Claims Intelligence Suite

AI-Assisted Claims Preparation and Contractual Intelligence for EPC Projects.

Never miss a notice, never lose an entitlement. Deployed on MAHSR T-3 — INR 3,142 Crore FIDIC Yellow Book.

Prepared by Samanta Nayak Contracts & Claims Management · Infrastructure AI Architect
InfraMind EPC

1. EXECUTIVE SUMMARY

The Problem

EPC megaprojects represent high-stakes, contractually complex undertakings. On a JICA-funded railway electrification project or an INR 3,000+ Crore ballastless track package, delay events, variation instructions, and unforeseeable site conditions are daily occurrences.

 **InfraMind EPC** claims preparation systems remain broken. Contractors lose key entitlements because notice deadlines (typically 28 days under FIDIC Sub-Clause 20.1) slip

through manual tracking. Delay analysts spend weeks compiling contemporaneous event logs, and claims managers write narratives that lack contractual structure and precision, leading to rejection by the Engineer and costly disputes in ICC arbitration.

The Solution

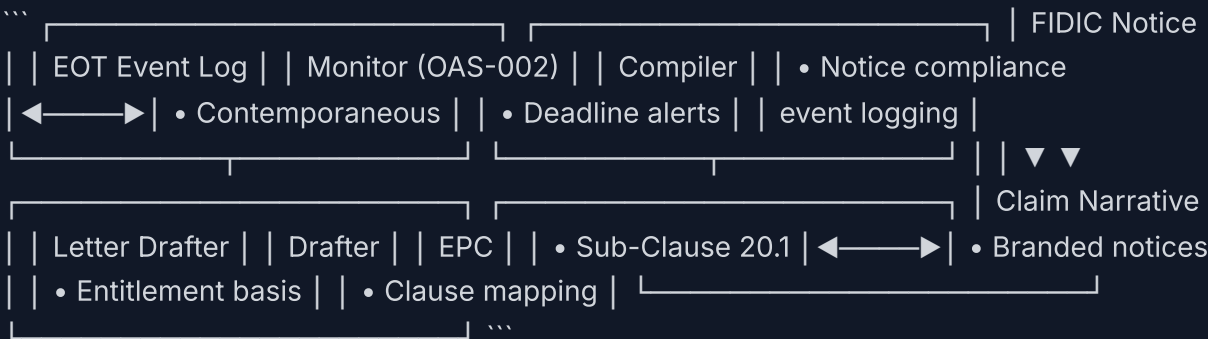

The **FIDIC Claims Intelligence Suite** by InfraMind EPC is a practitioner-built, integrated suite of four AI-assisted modules that automate claims preparation and correspondence. Grounded in 20+ years of active contract administration experience on live infrastructure megaprojects, it ensures 100% notice compliance, compiles forensic-grade contemporaneous records, and generates contractually precise correspondence.

The Value

Metric	Impact
Notice Compliance	Automated notice alerts and escalation to prevent time-bars
Record Quality	Contemporaneous delay logs with contractual attribution
Narrative Speed	From weeks of drafting to hours of AI-guided assembly
Correspondence Precision	100% accurate clause references and professional tone
Entitlement Preservation	Fully documented and substantiated FIDIC claims

2. THE FOUR-MODULE ARCHITECTURE

The suite integrates four modules across the lifecycle of contract administration and claims preparation:

2.1 FIDIC Notice Monitor (OAS-002)

*** Status: Building * Focus:** Notice Compliance. Zero Missed Deadlines. *** Capabilities:** Automated monitoring of FIDIC contractual notice obligations. Tracks 20+ clause types,

triggers alerts at 28/14/7/3/1 days, and escalates missed deadlines through a 4-level matrix to protect claims from being time-barred.

2.2 EOT Event Log Compiler

* **Status:** Concept Spec * **Focus:** Contemporaneous Delay Records. Defensible EOT Claims. * **Capabilities:** Automated compilation of delay events from project schedules, correspondence, and site records. Creates contemporaneous event logs that support Extension of Time claims under FIDIC Sub-Clause 8.4.

2.3 Claim Narrative Drafter

* **Status:** Concept Spec * **Focus:** Structured Claims. Persuasive Narratives. * **Capabilities:** AI-assisted drafting of FIDIC claim narratives under Sub-Clause 20.1. Structures claims with entitlement basis, cause-effect analysis, delay correlation, and quantum summary — ready for Engineer review.

2.4 Letter Drafter EPC

* **Status:** Concept Spec * **Focus:** Contractually Precise Correspondence. Every Time. * **Capabilities:** Automated generation of FIDIC-compliant letters, notices, and correspondence. Ensures correct clause references, proper addressees, and contractually precise language for every communication.

3. SUPPORTED FIDIC PROCESSES

The suite covers 20+ FIDIC clauses, focusing on critical notice periods and claim entitlements:

Clause	Application	Notice Deadline	Trigger Event
--------	-------------	-----------------	---------------

InfraMind EPC	Sub-Clause 20.1	Contractor's Claim	28 Days	Event giving rise to claim
	Sub-Clause 8.4	Extension of Time	28 Days	Cause of delay
	Sub-Clause 4.12	Unforeseeable Conditions	28 Days	Discovery of conditions
	Sub-Clause 8.5	Delay Caused by Authorities	28 Days	Government/utility delay
	Sub-Clause 10.2	Taking Over Parts	28 Days	Partial takeover
	Sub-Clause 11.4	Defects Liability	28 Days	Defect correction notice
	Sub-Clause 13.7	Changes in Legislation	28 Days	Change in law
	Sub-Clause 14.8	Delayed Payment	28 Days	Payment delay
	Sub-Clause 15.2	Termination by Employer	14 Days	Notice of Contractor default
	Sub-Clause 16.1	Suspension by Contractor	28 Days	Payment/certification failure
	Sub-Clause 16.4	Termination by Contractor	28 Days	Employer default

4. BUSINESS OUTCOMES

Measurable impact from AI-assisted claims preparation:

- **100% Notice Compliance** — Zero missed deadlines across all FIDIC notice obligations.
- **85–90% Reduction in Preparation Time** — From weeks of manual drafting to hours of AI-assisted preparation.
- **100% Entitlement Preservation** — Every contractual entitlement captured and documented.
- **100% Clause Reference Accuracy** — Correct FIDIC clause references in every letter and notice.
- **Contemporaneous Records** — Defensible evidence created at the time of events, not retrospectively.
- **90%+ First-Pass Acceptance** — Engineer-ready claims that require minimal revision.

5. USER ROLES & BENEFITS

The suite provides tailored benefits across all levels of project administration:

 InfraMind EPC		InfraMind EPC — FIDIC Claims Suite Executive Overview	
Role	Frequency	Benefit	

InfraMind EPC	Claims Manager	Daily	Complete claims oversight — notice compliance, event logs, narrative quality, and correspondence accuracy. inframindepc.com
	Contract Administrator	Daily	Automated notice tracking, letter drafting, and deadline management across all FIDIC obligations.
	Delay Analyst	Weekly	Contemporaneous delay event logs with attribution, supporting EOT claim preparation.
	Project Manager	Weekly	Claims dashboard — compliance status, pending deadlines, claim progress, and risk exposure.
	Legal Counsel	Monthly	Audit-ready claims documentation with contemporaneous records and contractual precision.
	Senior Management	Monthly	Executive claims intelligence — exposure summary, entitlement status, and recovery potential.

6. REPRESENTATIVE USE CASES

Use Case 1: FIDIC Yellow Book — EOT Claim (MAHSR T-3 Track Package)

* **Context:** Railway track construction with concurrent delays from Employer-caused design changes and utility handover delays under JICA oversight. * **Solution:** Notice Monitor tracked 12 delay events, EOT Log compiled contemporaneous records, Claim Narrative drafted 3 EOT claims, and Letter Drafter issued 8 contractual notices. * **Outcome:** 100% notice compliance, 3 EOT claims submitted within 28-day deadlines, INR 45 Crore entitlement preserved.

Use Case 2: FIDIC Red Book — Variation Claim (Highway Project)

* **Context:** Highway construction with 15 variation instructions issued by the Engineer, causing cumulative delay and cost overrun. * **Solution:** Event Log Compiler tracked all variations, Claim Narrative Drafter prepared a comprehensive claim under Sub-Clause 13.7, and Letter Drafter generated all correspondence. * **Outcome:** INR 12 Crore variation claim submitted with full contemporaneous evidence, leading to Engineer approval within 42 days.

7. FREQUENTLY ASKED QUESTIONS

InfraMind EPC

inframindepc.com

Q1: What is the FIDIC Claims Intelligence Suite?

An integrated suite of four AI-assisted modules that automate FIDIC contractual claims preparation and correspondence. It covers notice monitoring, event logging, claim narrative drafting, and letter generation — designed by practitioners who have administered FIDIC contracts on EPC megaprojects.

Q2: Which FIDIC editions are supported?

The suite supports FIDIC 1999 (Red, Yellow, and Silver Books) and FIDIC 2017 (2nd Edition). Clause references are mapped to both editions, with the 1999 editions as primary. Custom clause mapping is available for bespoke contracts.

Q3: Can I use individual modules without the full suite?

Yes. Each module operates independently. You can deploy FIDIC Notice Monitor as a standalone compliance tool, or use Letter Drafter EPC for all FIDIC correspondence. The suite delivers maximum value when all four modules work together.

Q4: How does this compare to generic contract management software?

Generic tools manage documents; the Claims Intelligence Suite manages obligations. It understands FIDIC clause deadlines, notice requirements, and claim entitlements — not just document storage. It was built by practitioners who have administered the exact contracts it serves.
